## Frontend developer with background in UX design

Frontend developer with backend understanding and hand-on experience in React, agile development, and design work. Worked extensively with UI components, Jira, debugging, and final delivery before launch during six months of internship at a startup. Combines technical implementation with UX and design knowledge.

### Skills

**Frontend:** Good skills in React, JavaScript, HTML, CSS, basic Angular and TypeScript

**UX & Design:** Good skills in Figma, UX principles, basic accessibility knowledge (WCAG)

**Other:** Git, API understanding, agile development, backend fundamentals (C#, SQL, PostgreSQL)

### Experience

#### Frontend developer (LIA internship) / Nilo Collaborations / 6 months

- Developed a React web app using agile workflow including sprints, demos, and feedback sessions
- Implemented UI components based on Figma designs
- Worked continuously with Jira tickets, debugging, and contributed to preparing the web app for launch.

#### UX designer (Erasmus internship) / Extramus / 4 months

- Identified and defined product requirements
- Created mockups for a mobile app in design team

### Projects

**E-commerce platform (React):** Responsive online store focused on component-based architecture, reusable UI components, and a functional shopping cart flow

**UX-focused booking platform:** MVP developed with a user-centered approach, from requirements analysis to prototyping and implementation, with a focus on accessibility and usability

**Content management system (Angular):** Simpler content management system with REST API integration, built to understand modular component structure and data flows

### Education

Associate degree in frontend development / EC Utbildning / 2026

Master's degree in user experience design / Jönköping University / 2022

Bachelor's degree in information architecture / University of Borås / 2021

### Strengths

Communicative • Team-oriented • Curious • Responsible • Solution-driven
